

# Extractive Metallurgist

An extractive metallurgist would have experience with floatation, bioleaching, and basic extraction technologies. Strong verbal and written communications skills and the ability to plan and meet deadlines would be desirable assets.

**A minimum of five years experience is required with demonstrated success in:**

- Working with customers to complete studies and demonstrations of metallurgical techniques for extracting metals
- Planning, executing and managing sampling and analysis plans
- Interfacing and building relationships with customers
- Supervising support staff and subcontractors
- Exhibiting a disciplined approach to experiment design and process development

*Note: This is an example of a position we typically fill. Although we are not currently recruiting to fill a vacancy, if you are interested in having your resume on file, please send it to [careers@rpc.ca](mailto:careers@rpc.ca). Attachments should be in Word or PDF.*
