

# Mechanical Engineer

A mechanical engineer would have CAD experience, strong verbal and written communication skills and the ability to plan projects and meet deadlines. Experience in the nuclear or energy sectors would be desirable.

**Along with an engineering degree, a candidate would have a minimum of five years experience with demonstrated success in:**

- Working with customers and staff to progress innovative solutions to technical challenges
- Exhibiting a disciplined approach to engineering with a commitment to achieve planned objectives for both small and large projects
- Applying effective analytical and problem solving skills
- Identifying business opportunities and developing them into projects

*Note: This is an example of a position we typically fill. Although we are not currently recruiting to fill a vacancy, if you are interested in having your resume on file, please send it to [careers@rpc.ca](mailto:careers@rpc.ca). Attachments should be in Word or PDF.*
