150 Lutz St. Moncton, NB Canada E1C 5E9

Calibration and Equipment Repair

RPC provides calibration and equipment repair of a wide range of electronic equipment and mechanical tools. Our fully equipped labs can provide traceable calibration results for equipment such as gauges, dielectric strength testers, thermocouples, RTD's, dynamometers, multimeters, and linear measuring equipment. We can also perform calibrations on equipment used in oxygen enriched atmospheres such as pressure gauges for oxygen systems and in medical applications.

Qualifications

Our fully equipped calibration lab maintains traceability to National Standards. The calibration staff includes mechanical engineers, electronic engineering technologists and a support staff of mechanical technologists. With a fully equipped machine shop at RPC, specialty parts or repairs can be easily produced and installed.

Services

Traceability is maintained in electrical properties including voltage, current and resistance, as well as physical properties such as temperature, pressure, dimensional and force. Capabilities include calibration and repair of electronic and mechanical tools including:

- Pressure Gauges to 10,000 psi
- Dielectric testers
- Thermocouples, RTD's and thermometers
- Multimeters
- Dynamometers and load cells
- Calipers
- Micrometers
- Scales
- Linear measuring devices

Facilities/Equipment

- Fully equipped calibration lab traceable to National Standards and ISO 9001
- Fully equipped machine shop
- Calibration furnaces
- Environmental chamber
- Mitutoyo – CNC Coordinate Measuring Machine FN1106 (5 axis)
