Custom Machining & Manufacturing

RPC works with manufacturers and entrepreneurs to help develop their ideas for innovative new products. Our modern machine shop is well suited for its specialized role in product development; equipped with a versatile range of tooling including laser cutter, coordinate measuring machine, CNC turning and milling centres, and a waterjet cutter. Heat treatment and welding facilities are also available.

Qualifications

RPC's staff includes journeymen machinists, mechanical and electronic technologists and senior design engineers. Our staff have experience serving various industries including; food and beverage processing, pulp and paper, forestry and nuclear power.

Services

- Manufacture 1st off prototypes
- Short run machining
- Manufacture hard to source parts
- Over flow machining capacity
- Laser cutting
- Waterjet cutting
- Plunge EDM cutting
- Heat treating
- Specialize in manufacturing for the nuclear industry and food processing

Facilities/Equipment

- Nakamura – Tome Superturn CNC Lathe
- HAAS VF-2YT CNC 4 Axis Milling Machine
- MAZAK CNC 4 Axis Milling Machine
- Flow Mach 2b Waterjet Cutter
- Mitutoyo CNC Coordinate Measuring Machine
- Range of conventional mills and lathes for varying applications
- Surface grinding equipment
- Heat treating
- Welding

Contact

For further information regarding our services please contact:

John Aikens, P.Eng.
