Sequencing Services

We are an independent molecular biology laboratory working with clients seeking to outsource routine sequencing and other biotechnological services. From our ISO 9001:2008 facility, we are committed to the needs of our clients, from entrepreneurs to multinational firms. For this reason we now offer sequencing of polymerase chain reaction (PCR) products or plasmids at very low competitive prices.

Sequencing of PCR or cloned products:

Give us your purified single band PCR product or plasmid along with the appropriate sequencing primers and we will quickly and affordably provide you with sequence results within 24-48 hrs of sample submission. The results will include an electronic file containing the sequencing data.

- \$10/ sample/primer for 16+ samples
- \$15/ sample/primer for 1-15 samples

Notes:

- 1) DNA must be submitted in a volume of 30ul at a concentration of 10ng/ul (PCR products) or 100ng/ul (plasmids).
- 2) Separate tubes containing 10ul of the necessary primers at a concentration of 3.2pmoles/ul must also be submitted.

Other sequencing services:

Please call for great pricing on plasmid walking, bulk sequencing, etc.

Our efficient and courteous staff take pride in maintaining strict client confidentiality. We look forward to serving you!

Contact

For further information on our sequencing services or to send samples please contact:

Dr. Ben Forward
Dept. Head, FFA
Tel: 506.452.1365
Fax: 506.452.1395
Email: info@rpc.ca

Sherry Binette
Genotyping Specialist
Tel: 506.460.5667
Fax: 506.452.1395
Email: info@rpc.ca

RPC's quality management system is registered to ISO 9001:2008.
