

FOR IMMEDIATE RELEASE

## RPC Highlights Over 30 Years of Nuclear Energy Experience

April 21, 2020, Fredericton, NB - RPC recently released a brochure highlighting some of the projects and activities with nuclear energy.

“This is a model example of RPC innovation services,” notes Steve Holmes, P.Eng., Chief Operating Officer. “We have responded to local needs for expertise and innovation, and marketed our expertise globally.”

The brochure highlights projects across Canada and around the world. The applications include everything from specialized flow measurements through to custom tooling to aid in inspections and refurbishments. Additional information is available in the brochure [here](#).

“As the industry transitions to small modular reactors (SMRs), RPC is looking to apply our expertise to this new technology,” noted John Aikens, P.Eng., Director of Engineering Services.

Steve Holmes emphasized, “We are excited that New Brunswick has identified SMRs as a strategic technology and look forward to contributing to its success.”

### About RPC

RPC is New Brunswick’s provincial research organization (PRO), a research and technology organization (RTO) with locations in Fredericton, Moncton, and St. George, NB. RPC’s complement of 170 scientists, engineers, technologists and support staff operate from a 13,000 sq. meter facility housing world-class analytical chemistry and material-testing laboratories, comprehensive life science capabilities, an internationally recognized fish health lab, extensive product development, design, manufacturing and testing services, and a wide variety of pilot facilities for the development and improvement of industrial and environmental processes and products.

RPC holds over 100 accreditations and certifications including a diverse ISO 17025 scope from the Standards Council of Canada (SCC) and is ISO 9001:2015 certified. Further information about RPC’s services is available from [www.rpc.ca](http://www.rpc.ca).
