FUTURE FACTORY ASSESSMENT

Our customers are great at identifying the outcomes they want to achieve for their businesses, however, where they often need help is identifying the solutions that will get them to those outcomes.

RPC's onsite assessment process starts with our experts visiting your facility for a single day or multi-site engagement. Using our powerful visual simulation assessment process, we will assess and collaborate with your team on your production processes.

ON-SITE ASSESSMENT

- One day or multi-site engagement
- Assess current production
- Collect facility drawings, photos, videos
- Identify high-level production issues and future planned expansion

FACTORY SIMULATION & AUTOMATION PLANNING

- Layout existing & future plant or process
- Add future equipment & processes to digital model
- Run simulation scenarios to evaluate planned equipment
- Calculate ROIs
- Visualize future factory in operation

DIGITAL REPORT & AUTOMATION ROAD MAP

- Present digital Powerpoint report
- Provide video & simulation data
- Recommendations for capital expenditures
- Automation planning road map
- Equipment ROIs

ASSESSMENT RESULTS

Our engineers will deliver an in-person future factory simulation, complete with their results and findings, business justification and recommendations (including ROI calculations) to help:

- Increase throughput and quality
- Secure funding for capital expenditure
- · Increase safety and security
- Decrease operating costs (labour, material, and energy)
- Visualize your future factory

HOW TO GET STARTED

For more infomation or to schedule your assessment contact RPC:
