## Microbiology Services

**R**PC's Microbiology Laboratory has been providing diagnostic services to customers in the food, beverage, feed and environmental industry sectors for over 35 years. To keep pace with our customers' needs, we hold accreditation with the Standards Council of Canada and are registered to the ISO 9001:2015 standard.

### Microbial Analyses

We provide the following microbial analyses for a variety of matrices, on a regular basis. For non-standard analyses, we can also develop a program to meet customer needs.

#### Standard Microbial Analysis

- Aerobic Bacteria Count
- Yeast & Mold Count
- *Enterobacteriaceae*
- *Coliform & E. coli*
- *Staphylococcus aureus*
- *Salmonella spp*
- *Listeria monocytogenes*
- *Listeria spp* (Environmental)
- *Campylobacter jejuni/coli/lari*

#### Water Analysis

- *Coliform & E. coli*
- *Enterococcus*
- Heterotrophic Plate Count
- *Legionella pneumophila*
- *Pseudomonas aeruginosa*

### Results

Depending on the analysis, results are provided in report format within 1-7 days upon receiving your sample.

### Sample Submission Forms

Please contact us and we will provide you with Sample Submission Forms to ease your paper burden in getting samples to us for analysis. You can also download forms from [www.rpc.ca](http://www.rpc.ca).
