

FOR IMMEDIATE RELEASE

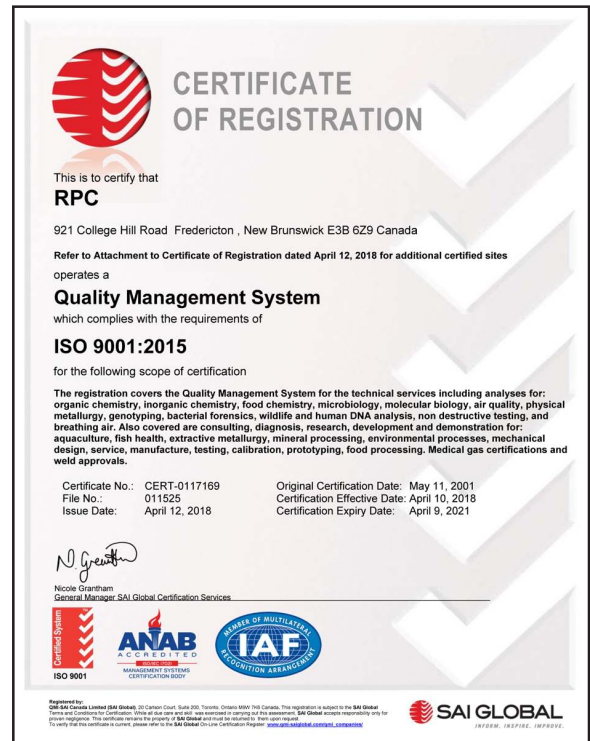

RPC Obtains ISO 9001:2015 Accreditation for Fredericton, Moncton and St. George Labs

May 15, 2018, Fredericton, NB - RPC has recently completed a successful audit that has resulted in ISO 9001:2015 accreditation for its Fredericton, Moncton and St. George laboratories. RPC's Fredericton and Moncton sites were previously ISO 9001:2008 accredited.

"We are proud to have all three of our sites ISO:9001 accredited, and to be upgraded to the most recent ISO 9001:2015 standard," noted Eric Cook, Executive Director. The 2015 standard incorporates Plan – Do – Check – Act principles and emphasizes risk management and continuous improvement.

RPC is committed to quality. While the organization holds many accreditations, including a comprehensive scope of ISO 17025 parameters, ISO 9001 is the international standard that specifies requirements for an overall quality management system (QMS). Registration demonstrates the ability to consistently provide products and services that meet customer and regulatory requirements.

RPC Fredericton was originally ISO 9001 registered in May, 2001.

About RPC

RPC is a research and technology organization (RTO) offering contract R&D and technical services. RPC's scientists, engineers and technologists are supported by world-class analytical laboratories and pilot facilities. RPC offers comprehensive analytical services to licensed producers of medicinal marijuana under the Access to Cannabis for Medical Purposes Regulations. We also offer applied research services helping clients with product and process development, and improved productivity.
